NOVEMBER 2005 PLEASE HOLD

Boot scootin'! *Country Dance Craze* comes with a line-dancing mat.

Dance Like You've Never Danced Before

Dance Dance Revolution used to be the only console game you played by cutting a rug. Now you can stomp through several new twists on the form. For the supercoordinated, *Pump It Up: Exceed* adds a fifth foot-activated button in the center of its mat for really tricky moves. For the budding diva, *Karaoke Revolution Party* comes with a USB microphone so you can sing "Crazy in Love" while jumping around. For the achy-breaky set, *Country Dance Craze* comes with a doublewide line-dancing mat. And for those who scorn the devil's music, *Dance Praise* for Windows and Mac blesses you with some 50 Christian rock hits. Interactive polka and clogging can't be far behind. — Chris Kohler
